Adra-e Workshop Day 3 – City & Country
March 31st, 2023.

AGRIVI

Mission

We empower agri-food industry with **digital agriculture solutions** to produce healthy, safe and nutritious food in a sustainable and profitable way.

Company Information

One of the leading **farm management software** companies based on over 100 global industry reports.

Supporting customers on all continents.

Awarded and recognized by UN FAO, Deloitte, EY, Financial Times and other.

Team of over 50 AgTech experts.

AGRIVI

We Empower
Global Impact

With our work we **impact 12 out of 17 sustainable development goals** and our impact analysis shows we **reach over 50 million people**.

AGRIVI 360 Family | Digital Agriculture Solutions

AGRIVI

FARM INSIGHTS

Easy to use farm management software

Suitable for
SME FARMS and
AGRIBUSINESS BANKS

FARM ENTERPRISE

Comprehensive farm management platform

Suitable for
ENTERPRISE FARMS and **FARM HOLDINGS**

FARM ADVISORY

Advisory farm management platform

Suitable for
**INPUT MANUFACTURERS** and **AGRONOMIC ADVISORS**

AG SUPPLY CHAIN

Supply chain management platform

Suitable for
FOOD & BEVERAGES companies

Central Platform
for Farm Agronomy
and Business Operations

AGRIVI offers the most comprehensive product

AGRIVI

We enhance **optimal decision making** by extracting **data-driven actionable insights** from a **core set of functionalities**

AGRIVI

Business processes	Precision Agriculture		Data Insights	Bots
RECORD	**COLLECT**		**ANALYSE**	**AUTOMATE**
CONNECT	**REPORT**		**RECOMMEND**	**PREDICT**
Integration	Compliance		Machine learning	AI

Optimal decision-making

CORE FUNCTIONALITIES STACK

ENABLERS: DATA & MODELING

Spray Advisor

Smart alarms for weather disasters, pest and disease risk

Precision Agriculture with VRA

AGRIVI

MULTI-LAYER MAPS
Prescription map creation based on 8 vegetation indices from satellites, soil and yield maps.

MANAGEMENT ZONES
Variable product distribution on up to 20 management zones per prescription map.

UPLOAD TO MACHINERY
Direct upload from AGRIVI to the machinery or export into file for USB use.

SIGNIFICANT SAVINGS
Save 20-40% of inputs with variable rate application.

Management zones ⓘ 3   Rate Kg/m2 ⌄

● Zone 1   0 Kg/m2

● Zone 2   0 Kg/m2

● Zone 3   0 Kg/m2

AGRIVI

European Innovation Council (EIC) has Chosen AGRIVI for Building the AI-driven Agronomic Adviser

To support the major goals of the European Union's Green Deal – to reduce the usage of pesticides by 50% by 2030, AGRIVI will develop the AI-driven agronomic adviser for all farmers in the EU.
READ MORE

#ROBI – EIC awarded project

ROBI is an AI driven digital advisory tool (chatbot) that aims to help farmers to choose the best course of action:

➡️ When to spray based on AI pest risk detection

➡️ Which products to use

➡️ When is it safe to harvest

In ROBI project, a multidimensional impact is expected:

➡️ Improved productivity and food safety

➡️ Less post-harvest food waste

➡️ Improved soil health and biodiversity

We Help the Food and Beverage Industry to Achieve Main Goals

Efficient vertical integration of supply chain and sourcing processes

Real-time monitoring of crop growth & health, risks and climate

Yield planning and harvest monitoring to mitigate crop volume delivery gaps

Waste and **product recall risk reduction** by securing safe harvest

Compliance with food safety and regulatory standards

Sustainability and meeting ESG goals through adoption of best practises
